THE QUESTION EVERY SCALE OWNER MUST ASK

IS YOUR WEIGHBRIDGE LEAKING MONEY WHILE YOU SLEEP?

Every truck that crosses your scale is a financial transaction. But what happens when you are not watching?

- Is material leaving your site unrecorded — right now?
- Is your scale slowly losing accuracy, giving away product for free?
- What if your scale breaks down tomorrow morning at peak hours?

SENSWEIGHT®
by Unified Cloud Sensors

Your 24/7 intelligent digital guardian for truck scale operations. Open inside to discover how.

THE SOLUTION

SEE EVERYTHING.
FROM ANYWHERE.
IN REAL-TIME.

SensWEIGHT® transforms your standard weighbridge into a **smart, connected financial checkpoint**. It watches your scale 24 hours a day, 365 days a year — so you don't have to. No complicated installation.

STOP FRAUD & THEFT — INSTANTLY

Receive an alert on your phone the moment a truck is weighed outside business hours, or when **suspicious weight patterns** are detected. Your scale never sleeps — and neither does your guardian.

OPTIMIZE YOUR LOGISTICS

Know your **peak hours and busiest days**, identify bottlenecks, and track scale utilization over time. Turn operational data into smarter scheduling, reduced wait times, and a more efficient yard.

SEE YOUR WEIGHT IN MONEY

Convert every weighing event directly into **financial value**. Understand your revenue flow, quantify risk exposure from scale inconsistencies, and make decisions based on real numbers — not guesswork.

ADVANCED TIERS · DIGITAL TRUCK SCALES
PREDICTIVE INTELLIGENCE & SCALE HEALTH MONITORING

NEVER LOSE A DAY OF WORK

SensWEIGHT predicts breakdowns **before they happen**. We alert your team to fix a small issue today, instead of you facing a complete shutdown tomorrow morning at your busiest hour.

PROTECT EVERY KILOGRAM — AND EVERY DOLLAR

Even a 1% error in your scale means you are **giving away free product** with every truck. We monitor your scale's health continuously so every kilogram — and every dollar — is accounted for.

REAL RESULTS · REAL OWNERS

THE COST OF NOT KNOWING

Three real cases. Three different problems. One solution that changed everything.

CASE 01 · QUARRY OPERATION · SECURITY

A quarry owner believed his operations were fully secure. After installing SensWEIGHT®, the system flagged **unusual weighing activity at 2:00 AM**. The owner discovered that unauthorized material extraction had been occurring for months — completely undetected.

FINANCIAL IMPACT · SINGLE UNAUTHORIZED TRUCKLOAD (EXAMPLE)

VARIABLE	ESTIMATED VALUE
Material Weight	25 Tons
Market Value (per Ton)	\$60
Total Loss per Truck	\$1,500
SensWEIGHT Estimated Annual Cost	\$1,200 – \$1,500
ROI After One Night	> 100%

→ SENSWEIGHT PAID FOR ITSELF IN A SINGLE NIGHT. THE SCALE BECAME HIS MOST POWERFUL SECURITY ASSET.

CASE 02 · AGGREGATES PLANT · SCALE HEALTH

A plant manager arrived one morning to find his truck scale completely out of service. **Eight hours of lost operations** — dozens of trucks turned away, contracts delayed, and an emergency service call at premium cost. The failure seemed sudden, but the data told a different story: the scale had been **slowly drifting for weeks**, invisible to the naked eye. After digitizing the scale and deploying SensWEIGHT®, the service company now monitors performance trends daily. What used to be a catastrophic breakdown is today a **scheduled 20-minute maintenance visit** — before anything fails.

→ BREAKDOWNS DON'T HAPPEN SUDDENLY. THEY HAPPEN SLOWLY — UNTIL SOMEONE IS WATCHING.

CASE 03 · LOGISTICS COMPANY · OPERATIONAL EFFICIENCY

A logistics hub suffered daily from the same problem: **long queues of trucks waiting to be weighed during peak hours**, while the scale sat idle for hours at a time. Drivers were frustrated, fuel was wasted, and throughput was unpredictable. After deploying SensWEIGHT®, the company gained access to **predictive occupancy forecasts for the coming week** — based on historical patterns and live traffic data. Operations managers could now direct truck arrivals in advance, **distributing weighing activity evenly throughout the day**. Queues disappeared. Scale utilization doubled.

→ THE SCALE DIDN'T CHANGE. THE INTELLIGENCE AROUND IT DID.

THE ADVANTAGES OF SENSWEIGHT®

01 TOTAL FINANCIAL TRANSPARENCY

Turn raw weight data into **actionable financial intelligence**. Know your peak hours, identify bottlenecks, and see your material flow expressed directly in money — not just tons.

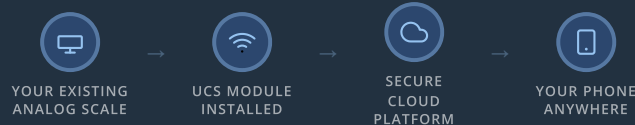

02 PEACE OF MIND — ALWAYS

Go home knowing your biggest operational asset is being watched by an **intelligent system that never sleeps**, never takes a day off, and alerts you the moment something changes.

03 ZERO DISRUPTION TO YOUR OPERATIONS

SensWEIGHT connects to your **existing scale**. No replacement, no downtime, no complicated setup. Your operations continue uninterrupted from day one.
