

... ENHANCE YOUR PERCEPTION.

Take Back **Control** of Your Belt Scale Today.

SensWEIGHT® connects to your existing belt scale. No new hardware required. Installed in hours, not days. Monitor material flow, energy consumption, and delivery accuracy from your phone — anywhere in the world.

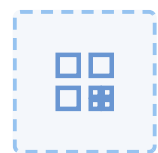

Works with any existing belt scale — no replacement or stoppage needed

Installed in hours, not days — minimal disruption to your production line

Monitor from your phone, anywhere — real-time flow rate, totals, and energy alerts

THE QUESTION EVERY BELT SCALE OWNER MUST ASK

IS YOUR BELT RUNNING **EMPTY** WHILE YOU PAY FOR IT?

Every meter of empty belt is energy wasted. Every unrecorded tonne is a delivery dispute waiting to happen. But what if you could see everything — in real time?

- Is your belt running empty for hours — burning energy with zero output?
- Do you know exactly how much material left your site today — and when?
- Can you prove delivery totals to your customers without dispute?

SENSWEIGHT®
by Unified Cloud Sensors

Your 24/7 intelligent IIoT guardian for belt scale operations. Open inside to discover how.

THE SOLUTION

KNOW YOUR FLOW.
CONTROL YOUR COSTS.
PROVE EVERY TONNE.

SensWEIGHT® transforms your existing belt scale into a **smart, connected production intelligence hub**. It monitors flow rate, cumulative totals, and belt activity 24 hours a day — alerting you the moment something goes wrong. No new scale. No production stoppage.

STOP PAYING FOR AN EMPTY BELT

Receive an instant alert when the belt runs idle beyond your defined threshold. **Identify empty-run patterns** by shift, day, or operator — and cut energy waste at the source.

CONTROL YOUR MATERIAL FLOW — LIVE

See real-time flow rate and cumulative tonnage on your phone. **Detect overloads, underfeeds, and stoppages** the moment they happen — before they become costly production losses.

PROVE EVERY DELIVERY — NO DISPUTES

Every tonne is timestamped and logged in the cloud. **Share certified delivery reports** with customers instantly — eliminating disputes and protecting your revenue.

ADVANCED TIERS · DIGITAL BELT SCALES
PREDICTIVE INTELLIGENCE & SCALE HEALTH MONITORING

NEVER LOSE A SHIFT TO A BREAKDOWN

SensWEIGHT detects load cell drift and mechanical anomalies **before they cause a shutdown**. Fix a small issue today — not a catastrophic failure tomorrow at peak production.

PROTECT EVERY KILOGRAM — AND EVERY EURO

Even a 1% weighing error means **free product leaving your site** with every shift. Continuous accuracy monitoring ensures every kilogram is accounted for — and billed correctly.

REAL RESULTS · BELT SCALE OWNERS

THE COST OF NOT KNOWING

Four real cases. Four different problems. One solution that changed everything.

CASE 01 · AGGREGATE PLANT · ENERGY & FLOW CONTROL

A plant manager had no visibility into how long his conveyors ran idle between loading cycles. After installing SensWEIGHT®, the data revealed that **belts were running empty for an average of 3.5 hours per shift** — consuming full motor power with zero material output. By setting automated idle alerts and adjusting the feeding schedule, the plant reduced energy costs by **over 18% in the first month** — without changing a single piece of equipment.

FINANCIAL IMPACT — PER MOTOR

CATEGORY	CALCULATION	ANNUAL
Energy consumption	45 kW × 7 h/day × 250 days	78,750 kWh
Cost of energy	78,750 kWh × €0.20	€15,750
SensWEIGHT® saving	18% reduction applied	€2,835 / yr

- › **Investment:** No new hardware, no production stoppage — upfront costs minimal.
- › **Payback:** Over €2,800 saved annually per motor on electricity alone — system pays for itself within the first few months.
- › **Hidden gains:** Extended belt & motor lifespan by reducing unnecessary mechanical wear.

→ **THE BELT BECAME A MANAGED ASSET, NOT AN UNCONTROLLED COST.**

CASE 02 · QUARRY OPERATION · DELIVERY ACCOUNTABILITY

A quarry owner faced a recurring dispute with a major client over delivered tonnages. Without a reliable digital record, every invoice was a negotiation. After deploying SensWEIGHT®, **every tonne was timestamped, logged, and traceable in the cloud**. The first delivery report sent to the client ended the dispute immediately. Within 60 days, the client **increased their order volume by 30%** — citing confidence in the data as the deciding factor.

→ **UNKNOWN DELIVERIES DON'T JUST COST MONEY. THEY COST TRUST.**

CASE 03 · PRODUCTION PLANT · DAILY PRODUCTION ACCURACY

Daily production was recorded by operators manually reading the belt scale totalizer at the end of each shift. A misread digit — or a reset of the counter — led to **incorrect production figures, flawed analysis, and wrong business decisions**. After deploying SensWEIGHT®, readings are taken from a **non-resettable cloud counter**. Daily production totals are calculated automatically, available instantly, and **impossible to alter or misread** — eliminating human error from the production record entirely.

→ **ACCURATE PRODUCTION DATA IS NOT A LUXURY. IT IS THE FOUNDATION OF EVERY GOOD DECISION.**

CASE 04 · PROCESSING PLANT · SILO MANAGEMENT & SMART ORDERING

Ordering raw material to refill silos was based on guesswork — operators estimated stock levels visually, leading to **emergency orders, production stoppages, and excess inventory costs**. By monitoring silo filling in real time through the belt scale, SensWEIGHT® built a **consumption history over time**. Its prognostic function now predicts expected material usage with high accuracy, allowing the procurement team to **place orders at exactly the right moment** — eliminating both stockouts and costly over-ordering.

→ **STOP GUESSING. LET THE DATA TELL YOU WHEN TO ORDER — BEFORE THE SILO RUNS EMPTY.**

THE ADVANTAGES OF SENSWEIGHT®

01

ENERGY COST UNDER CONTROL

Know exactly when and how long your belt runs empty. **Automated idle alerts** and shift-by-shift energy reports let you eliminate waste without guesswork.

02

DELIVERY PROOF — INSTANT & CERTIFIED

Every tonne delivered is **logged in the cloud with timestamp and flow data**. Share certified reports with clients in seconds. No more disputes. No more lost revenue.

03

ACCURATE PRODUCTION RECORDS — AUTOMATED

Non-resettable cloud counters replace manual readings. **Daily totals are calculated and stored automatically** — no misreads, no resets, no disputes with your own data.

04

ZERO DISRUPTION TO YOUR PRODUCTION

SensWEIGHT connects to your **existing belt scale**. No replacement, no stoppage, no complicated setup. Your line keeps running from day one.
