

... ENHANCE YOUR PERCEPTION.

Take Back **Control** of Your Silos Today.

SensWEIGHT® works with your existing silo structure. No new hardware required. Installed in hours, not days. Access your inventory data securely from your phone or computer, anywhere in the world.

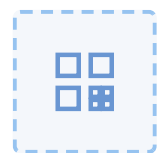

Works with any existing silo — no structural changes needed

Installed in hours, not days — minimal disruption to operations

Monitor from your phone, anywhere — 24 hours a day, 365 days a year

THE QUESTION EVERY SILO OWNER MUST ASK

ARE YOUR SILOS LEAKING MONEY WHILE YOU SLEEP?

Every kilogram stored in your silo is a financial asset. But what happens when you are not watching?

- Is material being stolen from your silo at unusual hours?
- Are you relying on guesswork for inventory, leading to late orders?
- Is material adhering to walls or foundation compromising your silo?

SENSWEIGHT®
by Unified Cloud Sensors

Your 24/7 intelligent digital guardian for silo inventory and security. Open inside to discover how.

THE SOLUTION

SEE EVERYTHING. FROM ANYWHERE. IN REAL-TIME.

SensWEIGHT® transforms your standard silo into a **smart, connected financial checkpoint**. It watches your inventory 24 hours a day, 365 days a year — so you don't have to. No new silo needed. No complicated installation.

STOP FRAUD & THEFT — INSTANTLY

Receive an alert on your phone the moment material is extracted outside business hours, or when **suspicious weight drops** are detected. Your silo never sleeps — and neither does your guardian.

OPTIMIZE YOUR LOGISTICS

Know your **exact inventory levels** at all times, preventing late orders and production halts. Turn operational data into smarter supply chain management and a more efficient facility.

SEE YOUR WEIGHT IN MONEY

Convert every stored kilogram directly into **financial value**. Understand your inventory value, quantify risk exposure from unknown contents, and make decisions based on real numbers — not guesswork.

ADVANCED TIERS · DIGITIZED SILOS
PREDICTIVE INTELLIGENCE & STRUCTURAL HEALTH MONITORING

NEVER LOSE A DAY OF WORK

SensWEIGHT detects **material adherence to walls and foundation compromising** before they become critical. We alert your team to structural risks, including lightning incidence effects, preventing catastrophic failures.

PROTECT EVERY KILOGRAM — AND EVERY DOLLAR

Unknown amounts of material mean you are **risking production stops or over-ordering**. We monitor your silo's true content continuously so every kilogram — and every dollar — is accounted for.

REAL RESULTS · REAL OWNERS

THE COST OF NOT KNOWING

Three real cases. Three different problems. One solution that changed everything.

● CASE 01 · CEMENT PLANT · SECURITY & FINANCIAL IMPACT

A plant manager believed his silos were fully secure. After installing SensWEIGHT®, the system flagged an **unusual weight drop at 3:00 AM**. Unauthorized material extraction had been occurring for months — completely undetected.

FINANCIAL SAVING ANALYSIS

Material Stolen	300 kg cement
Market Value	€150 / ton
Loss per Event	€45.00
Frequency	52×/year
Annual Revenue Leak	€2,340

COMPACT ROI

- ▶ **Stop the Leak:** Flags unauthorized extractions undetected for months.
- ▶ **Instant Payback:** A single 3 AM alert can pay for the system in one night.
- ▶ **Guardian Asset:** Smart financial checkpoint watching your inventory 24/7/365.
- ▶ **Zero Disruption:** Connects to existing silos in hours with no downtime.

→ **STOPPING A WEEKLY 300 KG THEFT: EVERY KILOGRAM AND EVERY EURO ACCOUNTED FOR.**

● CASE 02 · AGRICULTURAL FACILITY · STRUCTURAL HEALTH

A facility manager faced a near-collapse of a grain silo after a severe storm with lightning strikes. The structural damage seemed sudden, but the data told a different story: the silo had been suffering from **material adherence to walls and foundation stress** for months, invisible to the naked eye. After digitizing the silo and deploying SensWEIGHT®, the engineering team now monitors structural integrity and true content daily. What used to be a risk of catastrophic collapse is today a **managed, predictable asset**.

→ **STRUCTURAL FAILURES DON'T HAPPEN SUDDENLY. THEY HAPPEN SLOWLY — UNTIL SOMEONE IS WATCHING.**

● CASE 03 · MANUFACTURING PLANT · PREDICTIVE ORDERING

A production manager constantly struggled with late material orders, leading to costly production halts. They relied on manual checks and guesswork. After installing SensWEIGHT®, the system's **prognostic function tracked online filling and consumption rates**. The system now predicts expected material consumption long-term, making the ordering process highly accurate and automated. **No more guesswork, no more halted production.**

→ **SUPPLY CHAIN MANAGEMENT BECAME FULLY PREDICTABLE AND AUTOMATED.**

THE ADVANTAGES OF SENSWEIGHT

01 TOTAL FINANCIAL TRANSPARENCY

Turn raw weight data into **actionable financial intelligence**. Know your peak hours, identify bottlenecks, and see your material flow expressed directly in money — not just tons.

02 PEACE OF MIND — ALWAYS

Go home knowing your biggest operational asset is being watched by an **intelligent system that never sleeps**, never takes a day off, and alerts you the moment something changes.

03 ZERO DISRUPTION TO YOUR OPERATIONS

SensWEIGHT connects to your **existing silo**. No replacement, no downtime, no complicated setup. Your operations continue uninterrupted from day one.
